

Learning reflection 1

In this course of learning English. I felt a novelty because the learning method is not stressful or pressure like when studying in high school. It's a very interesting thing. This course will focus on communication training. Using English for speaking and writing to communicate, not focusing on grammar. Another exciting thing is acquiring English knowledge from doing a hobby that scholars liked, which I didn't do much before. The teacher came up with this learning style for us. We can do our favorite hobby while practicing English. That makes learning fun, and the students will not be too serious. Those things can help me to practice English well. At first, the teacher will let me choose my favorite hobby, that is crossword puzzles. I've never seriously done it. But the teacher can make me do what I like and be more useful to myself. I can practice from finding information that leads to listening, speaking, reading and writing. And allowing us to use the platform like Reddit, which is the gathering place of people all over the world. I can learn the language that people use in quotidian life.

What I've learned since I started this course is that the teacher gave me the courage to speak English. Don't be afraid to use the wrong grammar. Answering questions in class, both my accent and my vocabulary are quite wrong. But the teacher did not tell me off at all. Usually, I'm not a person who dares to speak. But this English language course makes me braver. Each time I don't know the words, I also learn to use aids to learn such as using google translate, Online-Utility.org, that I still use when I'm writing this text. But I must check the vocabulary every time. In the class, there will be a question-and-answer session, grouping, that makes me talk to my friends and practice using language for communication. Sometimes use the wheel to randomly ask or present the work. This makes learning more exciting. In this study course, I got more than practicing English. I got techniques. Either how to find information, know what google search can do, or use other search engines besides Google. How to use an English literacy aid such as Wordandphrase.info It will be a great help in my future learning. Each task given by the teacher. I can say

that it really helped me develop myself in English. Those things gave me the courage to speak and dare to do more.

Since the first time I studied with the professor, I like it very much. But I didn't turn on the camera or answer frequently. Because I still don't have the courage to speak or answer, my English speaking is very bad. But I like to study with you, teacher. I will keep practicing until I can speak or communicate in English confidently, to meet the objectives of this learning course. I think I'm very lucky to have you as a teacher.
